

Billy Foundation

LETTER FROM THE PRESIDENT

**Karen L. Graham
Chair./President**

Dear Friends of the Foundation:

We are pleased to present our Annual Report for 2006

The Foundation continues to look forward to the day when this disease can be stopped in its tracks. Little news has come in on the cure or even extended life of those diagnosed with Stage III and IV melanoma. There is some light on the correct diagnosis in difficult cases through DNA procedures, which should assist in fewer deaths to this insidious disease.

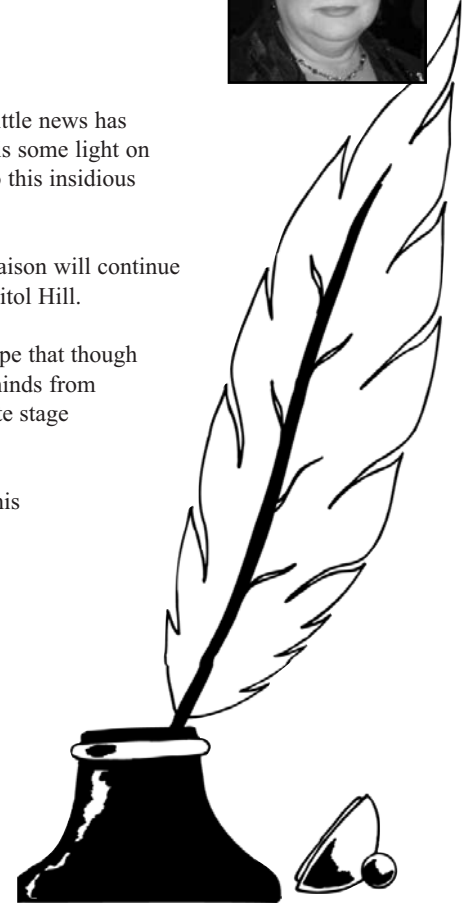

We are pleased to see a stronger cooperation between melanoma advocacy groups and hope that this liaison will continue to grow stronger year by year; particularly in the working together to make our voices stronger on Capitol Hill.

We still contend that early detection and prevention will save more lives until the cure is found; but hope that though many pharmaceuticals with clinical trials failed to get approval from the FDA that the great research minds from around the world will continue to build on what is already known and present a viable treatment for late stage melanoma.

We will continue to be a voice for patients and their families and know that "together we WILL beat this disease..."

Sincerely,

Karen L. Graham, Chair/ President
